HATSUTA WON SILVER PRIZE IN ECO MARK AWARD 2014

Hatsuta Seisakusho Co., Ltd (Head office: Hirakata city, Osaka, President and Representative Director : Kazuhiro Hatsuta) won Silver prize lately in "ECO MARK AWARD 2014" (Host organization : Japan Environment Association, Chairman of the board of directors : Mr. Akio Morishima).

"ECO MARK AWARD" is the award which Japan Environment Association founded in 2010, releases the outstanding example regarding to spread of environmental friendly goods, and aims to contribute for implementation of the sustainable society.

Awarded company or organization is considered as who is greatly contributed to the aim of eco mark industry "goods selection considering consumers' environment or formation of sustainable society by a company's environment improvement efforts"

Hatsuta acquired Eco-marked fire extinguisher in 2004, first time in fire protection industry. After that we proceeded to develop such environmental friendly products and acquired Eco-mark on the products.

As the leading company of fire protection industry, we got the license of fire extinguisher recycling system by Ministry of the Environment in 2006, started "NEW ECOSS•ZERO EMISSION SERVICE" to decrease consumers' waste in 2007 and got the license of using "CFP mark" first time in fire protection industry in 2011.

Moreover, we have put the world-first resin made N2 pressured type fire extinguisher "CALMIE", on the market in 2014, which reduces the environmental impact in the whole life cycle sharply compared with the conventional metal, and are performing environment-friendly corporate activity continuously and expansively after the eco-mark acquisition in 2004.

Such measures were highly evaluated and led to Silver price of "ECO MARK AWARD 2014".

Hatsuta is making efforts with our corporate philosophy of "Save Your Future" to protect irreplaceable life and important property, safety and security, products' high quality and environment as well.

Now, we would like to say that not only supplying safety and security through our products but also considering the environmental burden though life cycle of the products.
